

15th IAIS Annual Conference

2008 Budapest, Hungary

István Farkas

Chairman of the Board
Hungarian Financial Supervisory Authority

The 15th Annual Conference of the IAIS means for me integration. Integration into the society of the decisive countries in the insurance profession, integration also in a growing group of countries that have had the honour to host this year by year more important meeting of the experts of the insurance supervisory world. The Hungarian Financial Supervisory Authority as an integrated supervisor well demonstrates also the integration and globalisation of financial services, thus the title of the conference: Insurance and the Globalisation of Financial Services: Challenges for Worldwide Regulation and Supervision is of special significance for us.
